

HARTING Vending

TOWERLINE Shop

Theft-protected Vending System for Tobacco Products
for the highest Demands in continuous Operation

THEFT-REDUCING, CASH REGISTER INTEGRATED VENDING SYSTEM FOR TOBACCO PRODUCTS IN GAS STATIONS AND CONVENIENCE STORES

Secure Sale of Tobacco Products

For many years, HARTING has ranked as the preferential specialist for cigarette vending systems.

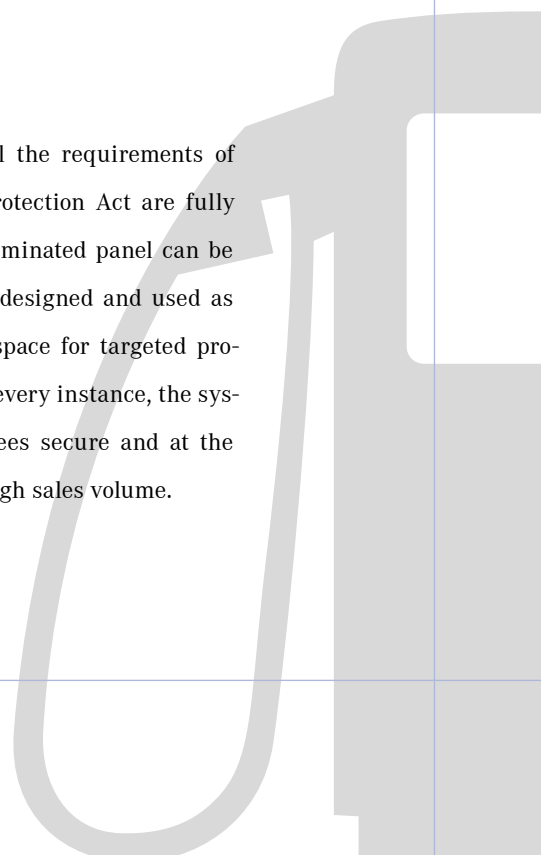

A unique combination of tradition and innovation guarantees optimal customer benefits. HARTING Vending has developed a flexible system for convenience stores. The TOWERLINE Shop presents cigarettes for specific target markets, while considerably reducing the risk of theft at the same time.

The Benefits

The TOWERLINE Shop offers different sizes and filling capacities depending on the sales space. The cigarette packet is dispensed by the cash-desk assistant. At the same time its removal is booked. Filling the machine can be limited to authorized persons. The models have three things in common: attractive design, ease of use and optimum theft protection. The use of TOWERLINE Shop will significantly reduce inventory discrepancies.

Naturally, all the requirements of the Youth Protection Act are fully met. The illuminated panel can be individually designed and used as advertising space for targeted promotions. In every instance, the system guarantees secure and at the same time high sales volume.

TOWERLINE Shop

The rate of theft for small but high-priced tobacco products in shops and petrol stations is rising to unacceptable levels.

The TOWERLINE Shop offers very high theft and break-in protection for the sale of tobacco products.

The TOWERLINE Shop can be integrated into the merchandise information system. The tobacco product can

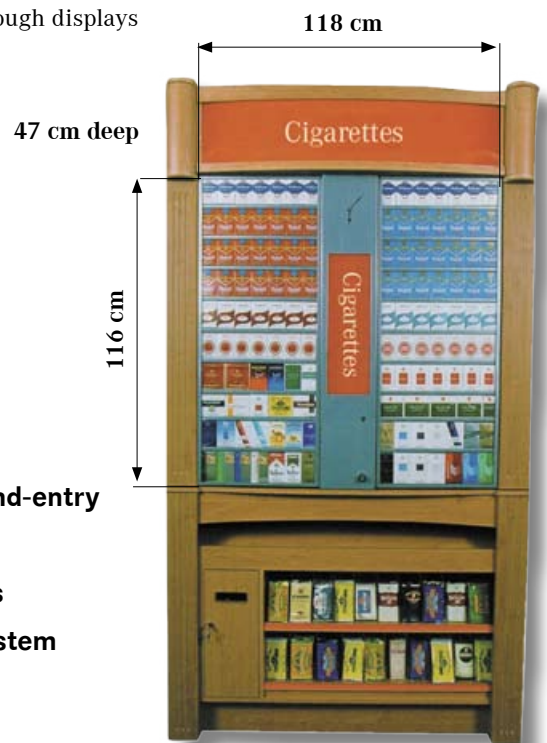

only be dispensed via a selection or TFT monitors, the TOWERLINE Shop impresses as a genuine eye-catcher. The number of brand options can be individually defined from 56 to 95 packets. The capacity is at least 1,100 packets, while space requirements are minimal. The vending units are easy to integrate into individual shop design.

The modular construction of the system can be adapted to fit almost any shop design. By retaining the visual presentation of the goods (original products) and by integrating advertising space through displays

only be dispensed via a selection or TFT monitors, the TOWERLINE Shop impresses as a genuine eye-catcher. The number of brand options can be individually defined from 56 to 95 packets. The capacity is at least 1,100 packets, while space requirements are minimal. The vending units are easy to integrate into individual shop design.
