

# HARTING

## PROSHOP

The latest generation of theft-preventing sales systems for tobacco products and other high-end consumer products

**THEFT-PREVENTING AND EASY-TO-OPERATE SECURITY  
AND SALES SYSTEMS FOR RETAILERS**

## Focus and Enforce

**HARTING has been active as a specialist for retail tobacco vending systems for many years.**

The unique combination of tradition and innovation delivers maximum benefits for retailers and consumers alike.

In addition to the extensive portfolio of the “SMOKYTHEK” family, HARTING Systems will continue to further develop the features of its PROSHOP system in line with evolving market requirements. As a result, the company will establish itself as the leading provider of solutions for storage and secure vending of high priced products that involve a high theft risk at food retailers.

## The benefits

**The PROSHOP system features selection units for use in the check-out area and other critical strategic areas and a central dispensing unit just behind the check-out area.**

The PROSHOP system offers three benefits in one package: the units sport an attractive design, are easy to operate and provide optimum theft protection. Using the PROSHOP system will dramatically reduce your inventory discrepancies. It goes without saying that the solution also ensures compliance with international efforts to increase youth protection.

The illuminated front door addition can be used for individually designed target-group oriented advertising.

Upon request, PROSHOP systems with central storage- and dispensing units located past the check-out area can be integrated to the merchandise management system already in use. This results in maximum transparency and automated planning/ordering.

# Principle

The server-based PROSHOP system connects the individual components with the assistance of the DECT wireless technology.

The selection panels can optionally be placed throughout thanks to wireless connection and their simple, convenient installation.

The selection units can either be operated in the conventional manner via foil keys or by way of touch screens. The placement of one or multiple dispensing units just past the check-out area minimizes the inventory volume and the machine restocking expenditures. Depending on your specific needs, you can select either the PROSHOP vending machine for cigarettes, roll-your-own tobacco and cigarette cartons or the Universal dispenser, which operates on the basis of spiral technology.

Item	Name	Price	Stock	Barcode	Color

# Product Features

- easy to use for store employees and consumers
- dispenser can be conveniently refilled from the front or from the back
- flexibly designed column configuration
- optimized inventory volumes and central stocking
- maximum theft protection and bread-in/burglary security
- illuminated advertising panels on the dispenser or glass front on the Universal dispenser
- integration into retail merchandise management systems

## Product Selection

Two different product selection solutions are available. The first is the conventional selection panel with 88 push buttons, while the other features the innovative 17" touch screen solution.

The keyboards are available with different sizes of brand labels (height 5 or 8 cm) for optional stand or wall installation.

The touch monitor and printer, on the other hand are integrated into a practical housing for shelf placement. Alternatively, the assembly can be placed on the optionally available stand.

A single 230 V power connection is all that is needed to connect either keyboard or touch screen.

## Integrated check-out

The PROSHOP system is connected to various merchandise management systems via defined interfaces and based on an intelligent protocol.

The error-free operation of the independent systems has stood the test of time and has proven itself in actual operations at a number of supermarket chains with different check-out systems in place.

The integration enables the utilization of the entire merchandise management system, including the automated re-ordering program.

In addition, the PROSHOP system offers the option of choosing and paying for prepaid telephone vouchers if this function is supported by the check-out system.

# Storage and Vending Versions

## PROSHOP Vending Machine

### PRODUCTS

- Cigarettes in packs
- Cigarette rolling tobacco

### BRANDS

- up to 88

### CAPACITY

- approx. 1,000 packs

### SPECIAL FEATURES

- Front and back loading
- PROSHOP-PC integrated in base cabinet
- Combination master and slave with just one scanner

## Carton Dispenser

### PRODUCTS

- Cigarettes in cartons
- Cigarettes in packs
- Cigarette rolling tobacco

### BRANDS

- up to 12 brand cartons
- up to 30 cigarette or tobacco brands

### CAPACITY

- 36 cartons of cigarettes
- approx. 500 packs of cigarettes or tobacco

### SPECIAL FEATURES

- PROSHOP-PC integrated in base cabinet

# PROSHOP XXL

## PRODUCTS

- Cigarettes in cartons
- Cigarettes in single packs
- Cigarette rolling tobacco

## BRANDS

- up to 12 brand cartons
- up to 90 cigarette or tobacco brands

## CAPACITY

- 36 cartons of cigarettes
- approx. 1,000 packs of cigarettes or tobacco

## SPECIAL FEATURES

- PROSHOP-PC for separate set up  
in store manager's office

## Universal Vending Machine

### PRODUCTS

- high price products of different shapes and sizes

### BRANDS

- up to 64 per vending machine

### CAPACITY

- approx. 1,800 packs

### SPECIAL FEATURES

- PROSHOP-PC for separate set up  
in store manager's office
- Combination master and slave possible  
only with the assistance of one scanner
- Products visible through front glass window
